Tuples: It is a group of similar or different data types.
→ It is immutable.

Tuple Concatenation:-

String Slicing :

S O P H I E

Positive Indexing 0 1 2 3 4 5

Negative Indexing -6 -5 -4 -3 -2 -1

↩

Tuple_Sorting

- Arranging the element in the ascending or descending order

How to convert a list into tuple ?

list = []

tup = ()

tup = tuple (list)

list = list (tup)
