

Patterns :-

Pattern 1 :-

	C1	C2	C3	C4	C5
R1	*				
R2	*	*			
R3	*	*	*		
R4	*	*	*	*	
R5	*	*	*	*	*

TICK:-

- 1) create a outer loop which will handle rows.
- 2) Create inner loop and try to connect with the row no. for print patterns.

	C1	C2	C3	C4	C5
R1	*				
R2	*	*			
R3	*	*	*		
R4	*	*	*	*	
R5	*	*	*	*	*

no. of rows = 5

no. of columns = 5

Observation $\Rightarrow$ no. of '*' in a row =
row no.

```
for row in range(6):
    for col in range(row):
        print("*", end=" ")

    print("\n")
```

Pattern 2

	C1	C2	C3	C4	C5
R1	*	*	*	*	*
R2	*	*	*	*	
R3	*	*	*		
R4	*	*			
R5	*				

$6-1=5$
$6-2=4$
$6-3=3$
$6-4=2$
$6-5=1$

```
for row in range(6):
    for col in range(6-row):
        print('*', end=" ")
```

R4 * | *

R5 * | *

6-2=2
6-5=1
6-row-num

↳ connection

for row in range(6):
print('*', end=" ")

print("\n")

Pattern 3:-

	c ₁	c ₂	c ₃	c ₄	c ₅
R1	*	*	*	*	*
R2	*	x	*	*	*
R3	*	*	*	*	*
R4	*	x	*	*	*
R5	*	*	*	*	*

for range(6):

for col (6):

print(*)

print("\n")

Pattern 4:-

1
12
123
1234
12345

for row in range(6):

digit=1

for col in range(row):

print(digit, end=" ")

digit=digit+1

print("\n")

Pattern 5 :-

1
22
333
4444
55555

for row in range(6):

digit=1 / row

for col in range(row):

print(digit, end=" ")

digit=digit+1

print("\n")

Pattern 6 :-

Pattern 6 :-
